UI & UX DEVELOPER

OBJECTIVE

When I see an awesome UI design, I always wonder, how can I make it alive. I believe in learning by doing. I am happy to play with different technology stacks based on business requirements and also wants to use my existing knowledge, in scaling and enhancing company products. As a UI developer I always make sure to develope a reusable, accessible and long lasting feature. At last our final product will depends on the amazing team who are passionate and irreplaceable. I am looking for such team and design obsessed people.
